SHC62-9043-279

Copy # /

September 12, 1962

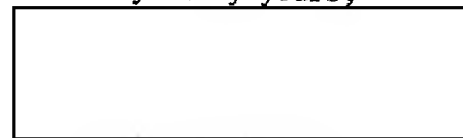

Dear Jim:

Attached are three copies of the Phase I, Final Report to Task Order #4, Contract BB-425. Enclosed also are five (5) copies of the DD-250 form covering the same. Would you kindly execute two (2) copies of the DD-250 and return.

I would like to point out that this report generally states that the original intent of the contract for the modification of this equipment is no longer entirely feasible. This matter has been discussed with your technical representatives who are fully aware of the negative aspects of this report. However, certain recommendations are contained which request that the contract be continued after certain redirection is received. The intent of this request for redirection is to provide a unit which will be more useful when modified than what is presently available. It appears that the technical recommendations forwarded can be accomplished without benefit of additional funds over and above the present contract value including Phase 2.

I hope that these recommendations are accepted and that we may be able to continue with the work on this contract without interruption.

Very truly yours,

Contracts Manager
